ERI and Integraal join forces to provide an integrated management information solution for private banks

ERI is delighted to announce a new partnership with the Geneva-based company Integraal Solutions, which specialises in creating software to support banks in their management decisions.

The two companies have collaborated to integrate Integraal's Solutions for Finance suite into ERI's OLYMPIC Banking System software package using an API. As a result, the process of installing Solutions for Finance is quick and easy.

Jean-Philippe Bersier, ERI's Director of Business Development, said: "Our clients hold a huge amount of operational data produced by their systems, particularly the OLYMPIC Banking System. It is therefore important for us to offer them tools with which to analyse this operational data, in order to help them in their management decisions. We were very impressed with the in-depth understanding of the needs of private banks demonstrated by the teams from Integraal Solutions, and by their ability to keep up with the constantly changing demands of private bankers."

Cédric Aeberli, Managing Director of Integraal Solutions, added: "OLYMPIC Banking System's modular structure allows financial institutions to add functionality gradually as their needs evolve. Solutions for Finance works perfectly with OLYMPIC Banking System and it offers ERI's clients an optimal management solution that will likewise evolve to meet the need for ever-more sophisticated solutions in a highly competitive sector."

Integraal

Integraal Solutions is the Swiss company that created the Solutions for Finance™ software, a tool designed to support management decisions and data analysis in the banking sector. Integraal has long been renowned for its expertise, and its products are based on a framework that uses the standard connectors employed by market-leading banking solutions to ensure the quality and consistency of the indicators provided. The platform, which offers an unmatched user experience, is based on industry-standard tools. The Corporate Edition offers interactive, dynamic, ready-to-use applications, while the Collaborative Edition gives experts complete freedom to create specific, collaborative, customised solutions oriented towards telling a story.
